### Professional background

Professional background relevant to GEOSNet:

<Dr. Chen has done a lot of work about geotechnical safety since he was a Ph.D. candidate. His research areas include slopes, landfills, tailing dams, contaminated sites, geotechnical risk assessment and management. He has contributed more than 40 SCI papers and is the reviewer for many journals such as Engineering Geology, Georisk, ASCE's Journal of Geotechnical and Geoenvironmental Engineering, Waste Management.>

Main reasons for your interest in GEOSNet and potential contributions to the network:

<Geotechnical safety is one of the major concerns in geotechnical engineering. GEOSNet is an collaborative and leading platform in this area. My research areas are highly related to GEOSNet. It is a

great chance to join GEOSNet, and collaborate with the distinguished scholars. I am happy to do the voluntary work including but not limited to organizing conferences, reviewing papers and writing bulletins.>
