Professional background

Professional background relevant to GEOSNet:

My research focuses on risk and reliability analysis of geotechnical engineering, model uncertainty characterization, Bayes updating and model selection. I am also interested in green technologies in geotechnical engineering, such as bioengineering for slope stabilization.

Main reasons for your interest in GEOSNet and potential contributions to the network:

I would like to cooperate with other members in GEOSNet and to jointly develop, improve and promote reliability-based methods, codes or standards in geotechnical practice.
