Personal information

Title: PhD student

Gender: (M/F) Female

Name: TEIXEIRA, Ana C. M.

Suffix: -

Mailing address (Street or Postal Box):

City: Braga

Province/State: Braga

Postal code: 4710-437

Country: Portugal

Email address: anacmteixeira@gmail.com

Website: -

Phone number:

Fax number: -

Current affiliation: University of Minho

Job title: PhD student and researcher in Geotechnical Engineering

Education Background

Highest degree received: Graduation in Civil Engineering

Received from: University of Minho, Portugal

Major: Graduation in Civil Engineering (5 years course covering all civil eng. areas)

Professional background

Professional background relevant to GEOSNet:

Ana Teixeira graduated with merit in Civil Engineering - University of Minho, July 2008. She is a researcher and PhD student from C-TAC (Department of Civil Engineering, University of Minho) since October 2008. Her research is mainly focused on the reliability and cost analysis of pile foundations, probabilities, uncertainties and study of empirical methods for determining the ultimate resistance of piles. She also worked on a research project (2007/2008), related to studies on the "use of wireless equipment and its application to geotechnical design and modeling of geotechnical structures" and attended in 2010, an internship at the University of Gifu under supervision of Prof. Yusuke Honjo.

Main reasons for your interest in GEOSNet and potential contributions to the network:

Since my area of research is reliability, directly connected to safety of geotechnical structures, it would be of high interest to me to be part of this network, so that I can connect with people of this area to exchange ideas and discuss topics, trade information, among others.
